- GitHub

Personal Bio

As a senior Bachelor of Science in Computer Science student, I've honed my skills in programming (C#), data analytics, project management, and research. During my thesis project, I served as the project manager, leading a team to gather data, organize the manuscript, and ensure content quality. I also took on the role of lead programmer, focusing on the ordering, sales, and inventory management module. This experience significantly enhanced my technical and leadership abilities
